DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

2. Group I claims 1-14 drawn to strain bending property of a pipe by using load buckling or strain stress curve.

Group II, claim 16-18, drawn to method of manufacturing a pipe, by using chemical components of its materials.

Claim 15, and some other claims are improperly multiple dependent
Claims 17-18 are improper since claim 17 is not further limiting.

3. The inventions listed as Groups I to II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Independent claims 1-4 and their dependent ones disclose a method for determining strain hardening property of a pipe with strict steps relating to pipe dimensions and procedure associated to the pipe buckling, or bending . The problem solved by these technical features is to measure magnitudes of the pipe and calculate the forces acting on the pipe causing the buckling or bending.

Art Unit: 2855

Independent claim 16 and its dependent ones disclose a method for manufacturing a pipe, by controlling the stress-strain curve and relating to the chemical component of material. These claims are not concern with the determination of the properties of the pipe. The problem solved by these technical features is to manufacture a pipe.

All technical features defining the invention of claims 1-15, and invention of claims 16-18 are different. They are therefore not common (Rule 13.2 PCT). They further differ from each other to such an extend that they are not considered as corresponding technical features (Rule 13.2 PCT). The application is therefore restricted to above groups.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
